

SannaLMS User Guide

A complete digital campus — learning, teaching, assessment, attendance, communication, and certification in one secure platform.

For students · trainers · college admins · platform admins

1. Welcome to SannaLMS

SannaLMS is a complete digital campus for colleges and universities. It brings *learning, teaching, assessment, attendance, communication, and certification* into one secure web platform — no separate tools, spreadsheets, or messaging apps needed.

For Students

Courses & lessons, quizzes, assignments, AI tutor, attendance, live classes, grade card & certificates.

For Trainers

Build courses, manage question banks, create quizzes & assignments, grade work, take attendance, run live classes.

For College Admins

Run one college: departments, branches, semesters, subjects, sections, courses, users, grades & analytics.

For Super Admins

Run the whole platform: onboard multiple colleges, manage them all from one dashboard, send announcements.

Every role sees exactly what they need

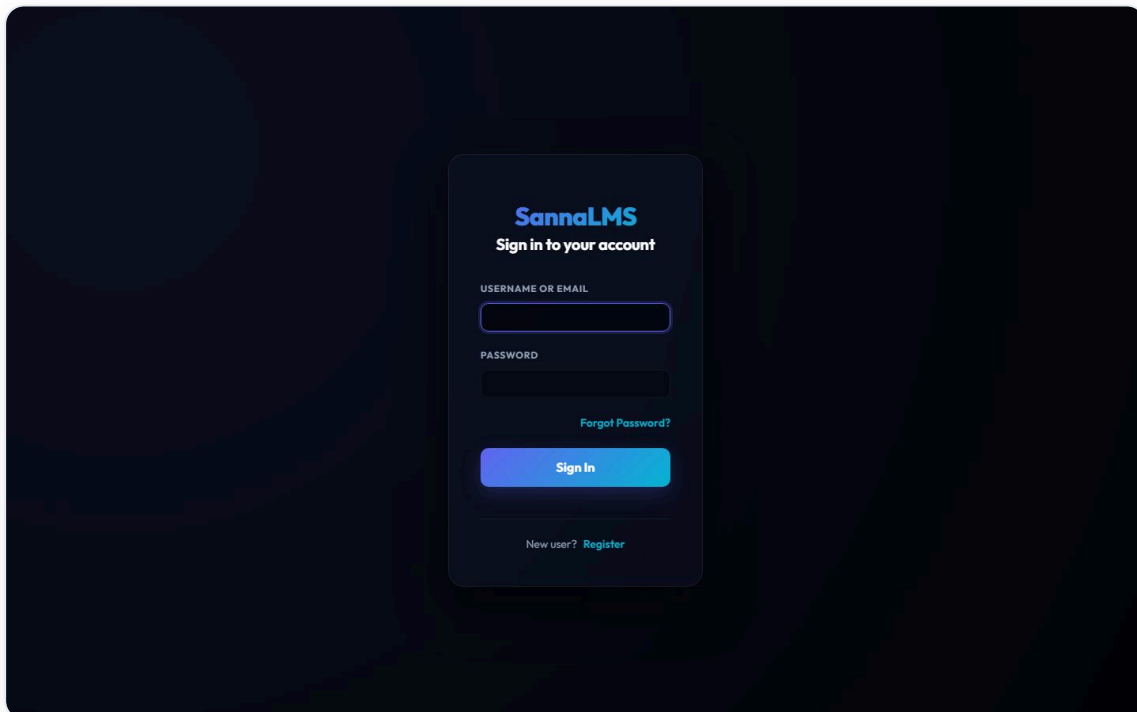

The platform is role-based: a student never sees another college's data or another student's answers. A trainer only sees their teaching tools. A college admin only sees their own college.

2. Quick Start — Log In

Two web addresses

- **Student & staff portal:** <https://sannalms.sannainnovations.com> — where students learn, take tests, and track progress. It is also the single sign-on entry point for everyone.
- **Admin dashboard:** <https://admin.sannalms.sannainnovations.com> — where admins and trainers manage the college.

Open the portal in any modern browser (Chrome, Edge, Firefox, Safari) on a computer, tablet, or phone. You will see the secure login screen below — sign in with the username and password your institution gives you.

The SannaLMS sign-in screen (single secure login for all roles)

Demo accounts

For testing, every demo account uses the password [Test@1234](#) :

Role	Username	What they can do
Super Admin	test_superadmin	Manage every college on the platform
College Admin	test_collegeadmin	Run one college end-to-end
Primary Trainer	test_trainer	Teach, create content, grade students
Teaching Assistant	test_assistant	Help the trainer with grading & attendance
Student	test_student	Learn, take tests, track progress

 **Tip:** sign in once on the portal, and the admin dashboard opens automatically if you have an admin or trainer role. The screenshots in this guide were taken with a fully set-up demo college (Green Valley University).

3. Super Admin Guide

The Super Admin owns the whole platform — the "control room" for one college or a group of colleges. Every college on the platform is completely separate: their data can never mix.

3.1 Dashboard

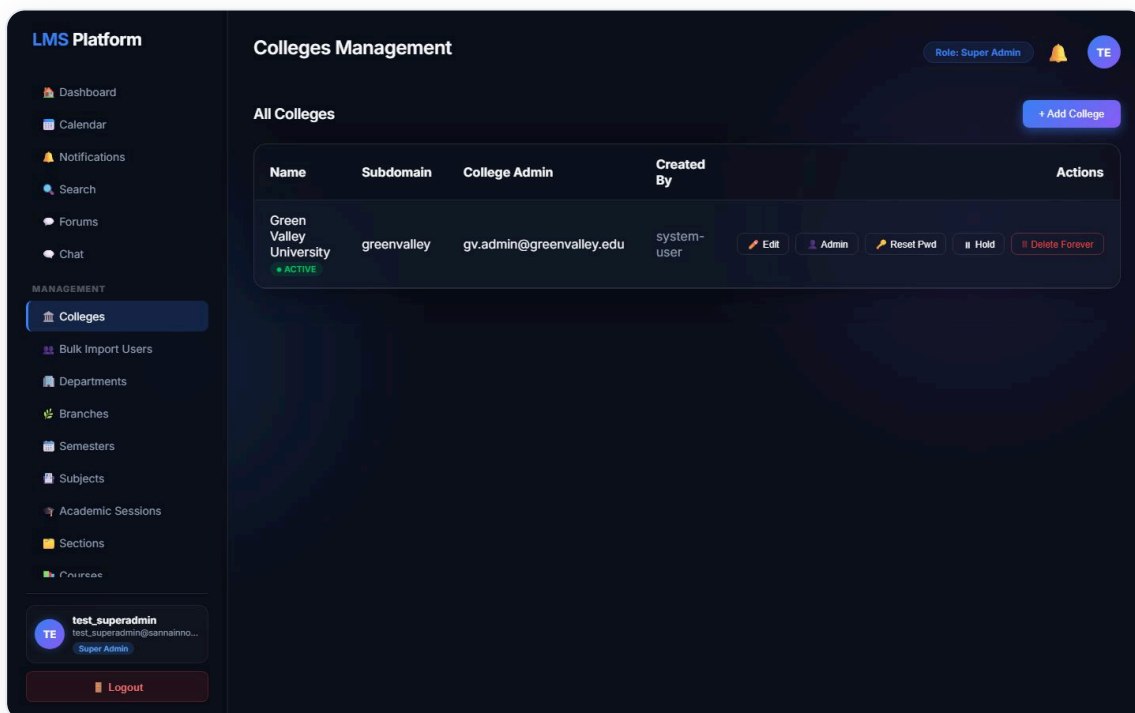

After login you land on the dashboard with platform-wide stats: number of colleges, departments, courses, and enrollments.

Super Admin dashboard — platform-wide statistics

3.2 Onboard a college (Colleges)

Click **Colleges** → **+ Add College**. Enter the college name, the admin's email and name, and a tenant ID. The college is created with its own private space, its own admin login, and its own data. You can put a college *On Hold* (soft suspend) or delete it permanently.

Colleges page — create, suspend, or delete colleges

3.3 Bulk import users

Click **Bulk Import Users** to upload a CSV of students/staff with their role, department, branch, and year. This is the fastest way to onboard hundreds of students.

The screenshot shows the 'Bulk Import Users' page in the LMS Platform. The left sidebar contains navigation links: Dashboard, Calendar, Notifications, Search, Forums, Chat, and a MANAGEMENT section with Colleges, Bulk Import Users (highlighted), Departments, Branches, Semesters, Subjects, Academic Sessions, Sections, and Courses. At the bottom of the sidebar is a user profile for 'test_superadmin' and a Logout button. The main content area is titled 'Bulk Import Users' and includes a description: 'Upload a CSV to create students, professors, and teaching assistants in bulk. Users get a Keycloak account with the right role, your college's tenant, and department/branch/year attributes.' Below this is a form with a 'College' dropdown set to 'Green Valley University (greenvalley)', two buttons 'Upload CSV File' and 'Load Sample CSV', and a 'CSV contents' text area containing a sample CSV line: 'email,first_name,last_name,role,department,branch,year student.1@college.edu,Aarav,Sharma,student,CSE,CSE-A,1'. At the bottom of the form is a 'Temporary password' field with 'Test@1234' and an 'Import Users' button. A footer note specifies roles and columns: 'Roles: student, professor (or instructor), teaching_assistant, college_admin. Columns: email (required), first_name, last_name, role, department, branch, year.'

Bulk import users from CSV

3.4 Build the college structure

Every college is organized the way a real institution is: **Departments** → **Branches** → **Semesters** → **Subjects** → **Sections**. Pick the college from the dropdown to see or edit only that college's structure.

6. Student Guide

The student portal is the heart of the product — everything a student needs for their day, from learning to attendance to certificates.

6.1 Overview

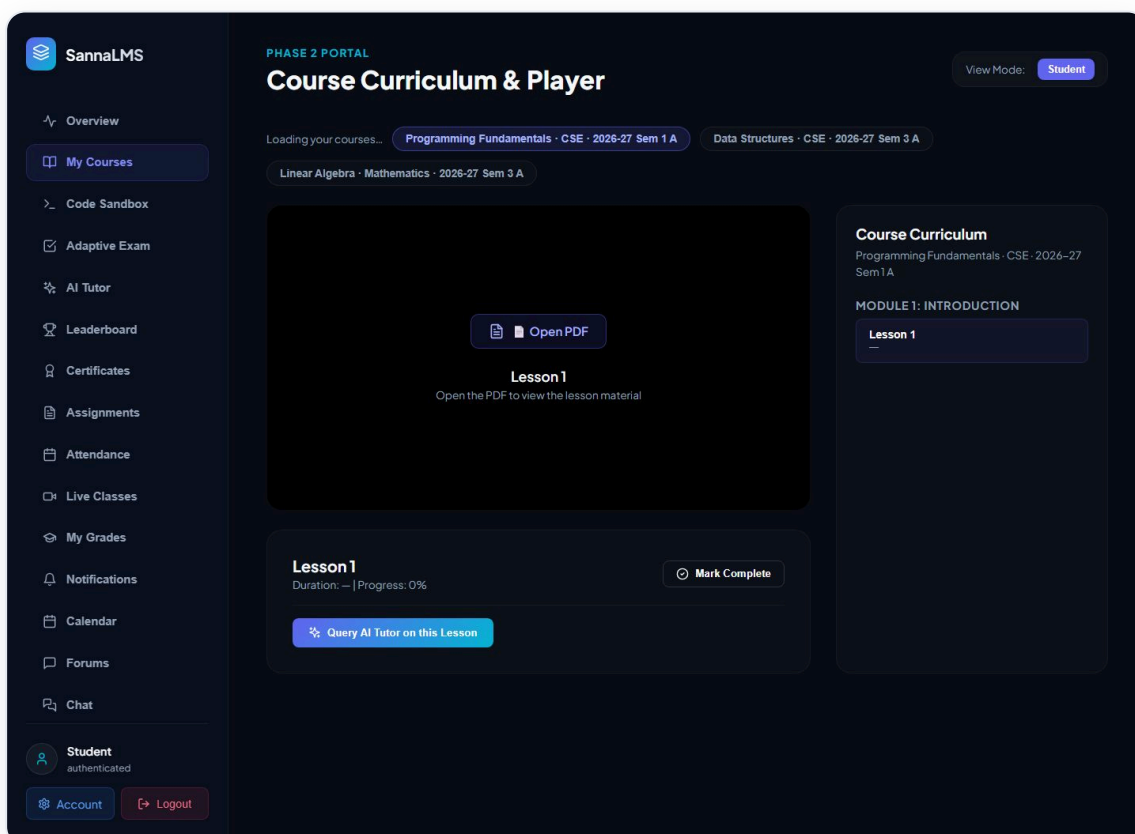

Your home screen: enrolled courses with progress, quick access to the code sandbox, adaptive exam, and AI tutor.

Student overview — courses, progress & quick launch

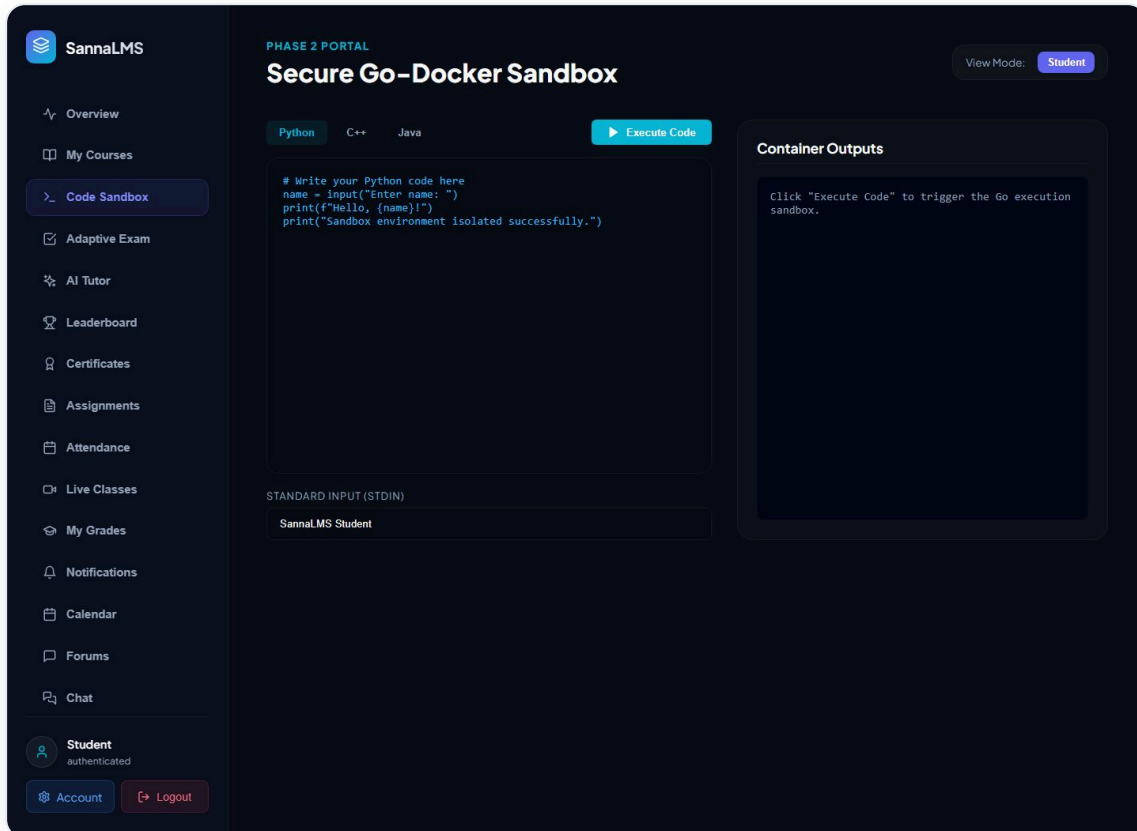

6.2 My Courses & lesson player

Open a course to see its modules and lessons. Each lesson has videos, PDFs, and notes. Progress is tracked automatically.

6.3 Code Sandbox

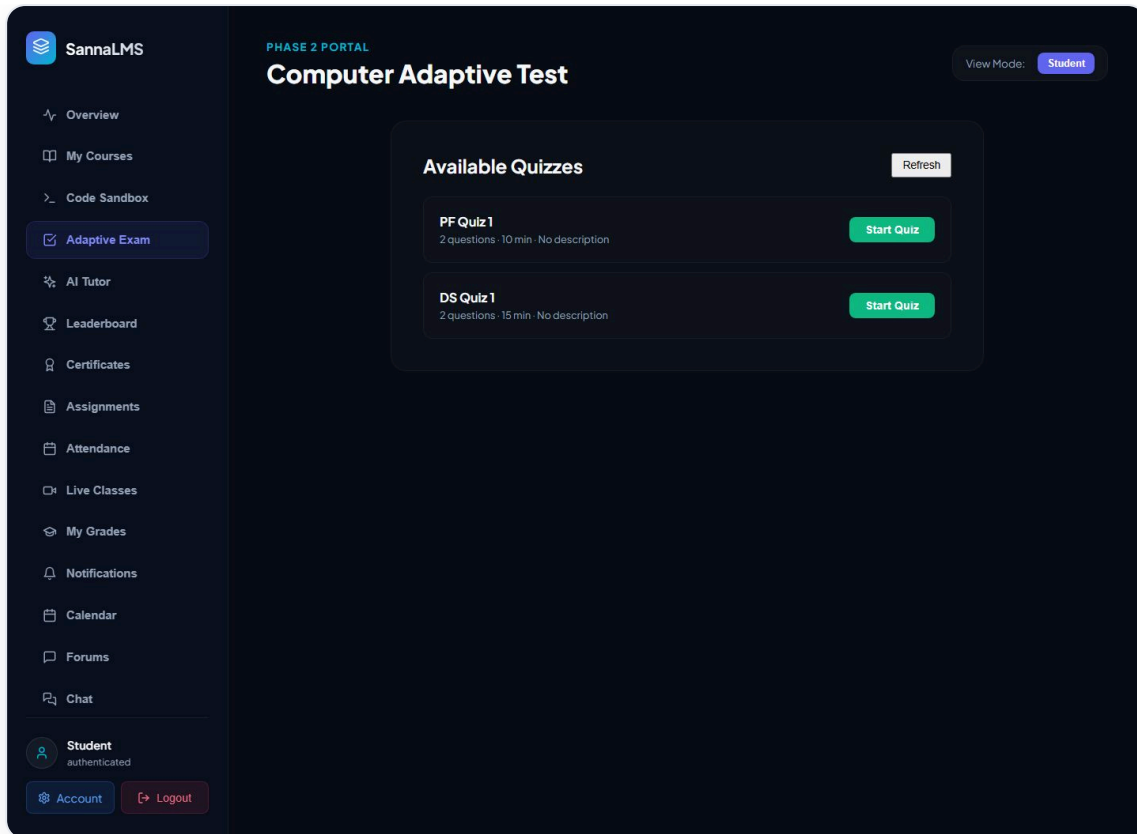

Write and run real Python, C++, or Java code in the browser — executed safely in an isolated sandbox. Perfect for programming courses.

Code sandbox — run real code in the browser

6.4 Adaptive Exam

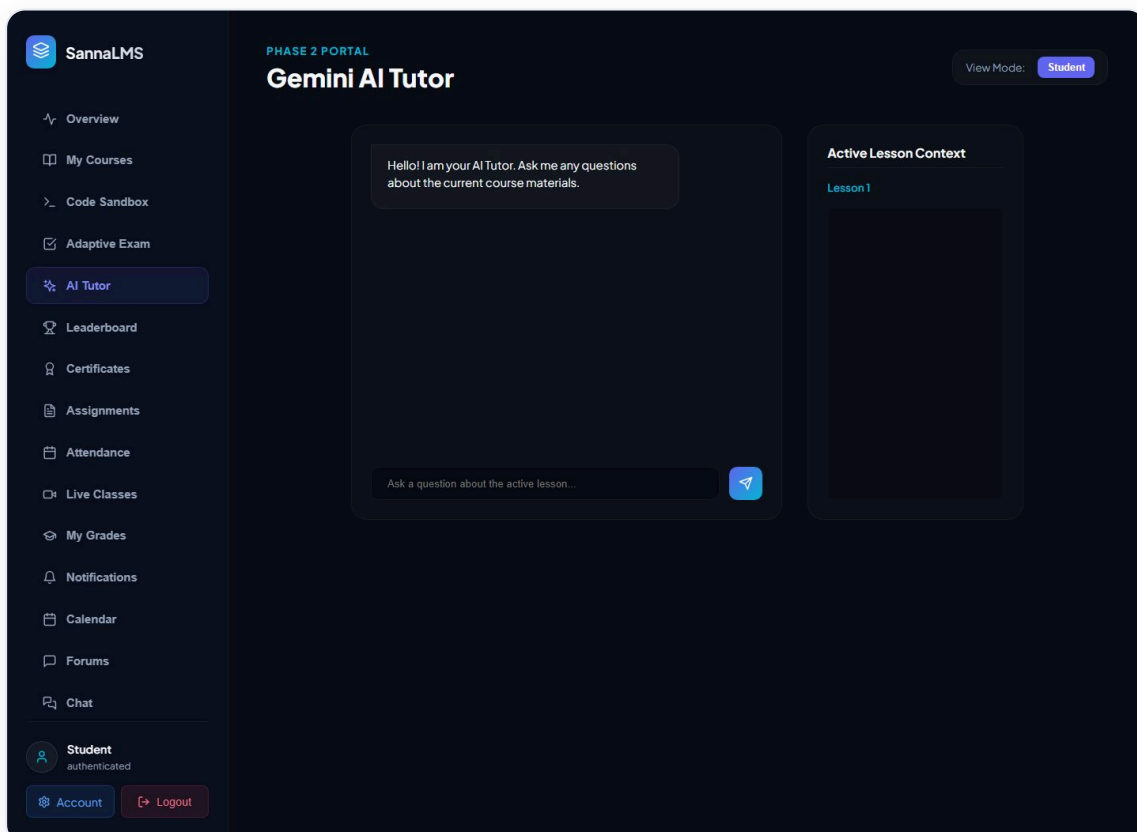

Take the quizzes your trainers published. The test adapts to your level, has a timer, and auto-submits when time runs out. Scores appear instantly in your gradebook.

Adaptive exam / quizzes

6.5 AI Tutor

A 24/7 AI tutor that answers questions strictly from your course material. Doubt at 11 PM? The tutor is awake.

6.6 Leaderboard & XP

Earn XP for completing lessons and quizzes, and climb the leaderboard — learning is gamified to keep you engaged.

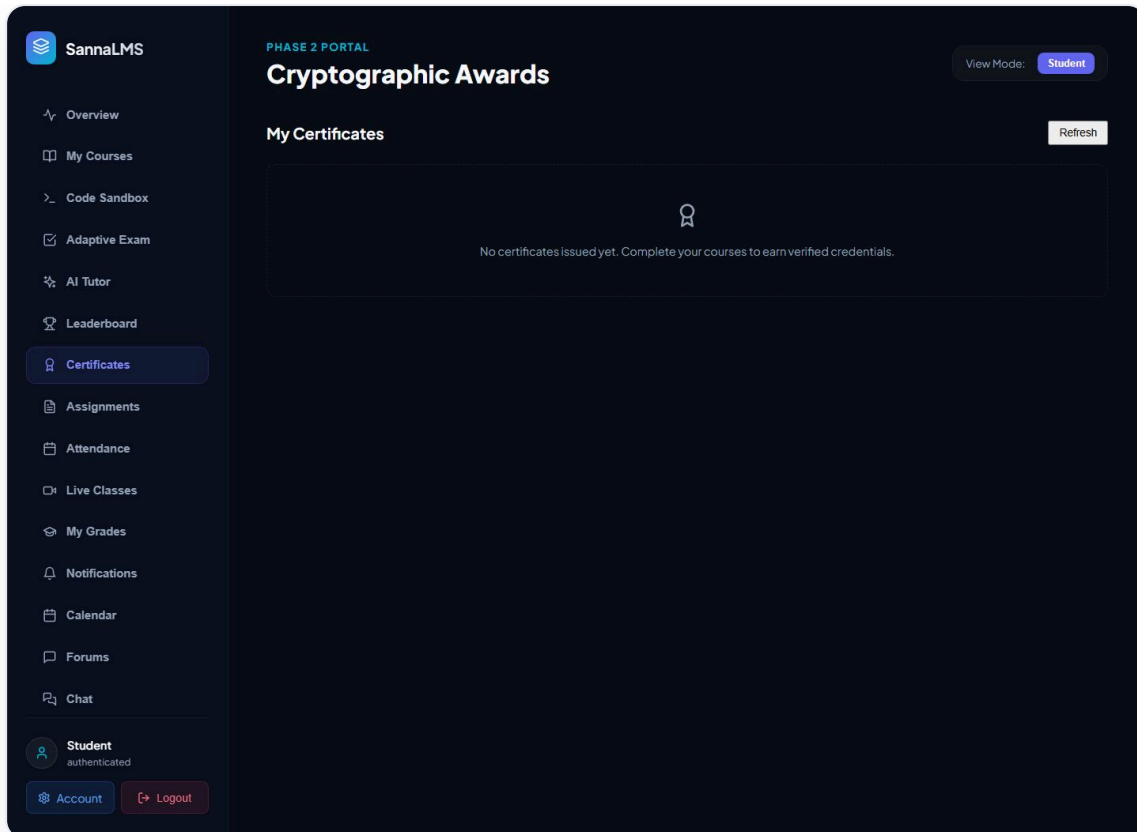

The screenshot shows the SannaLMS interface with a sidebar on the left containing navigation links: Overview, My Courses, Code Sandbox, Adaptive Exam, AI Tutor, Leaderboard (highlighted), Certificates, Assignments, Attendance, Live Classes, My Grades, Notifications, Calendar, Forums, and Chat. The main content area is titled 'PHASE 2 PORTAL Global Gamification' and includes a 'View Mode: Student' button. The 'Global XP Rankings' section displays a list of users with their levels and XP values. The user 'test_student (You)' is highlighted in the 4th position.

Rank	Username	Level	XP
#1	Diya Patel	Level 6	2,100 XP
#2	gv2026.csa.003@greenvalley.edu	Level 7	1,550 XP
#3	Aarav Sharma	Level 4	1,450 XP
#4	test_student (You)	Level 5	1,075 XP
#5	Ananya Sen	Level 3	980 XP
#6	Rohan Verma	Level 1	320 XP
#7	test_assistant	Level 2	300 XP
#8	Vikram Singh	Level 1	150 XP

Leaderboard & XP rankings

6.7 Certificates

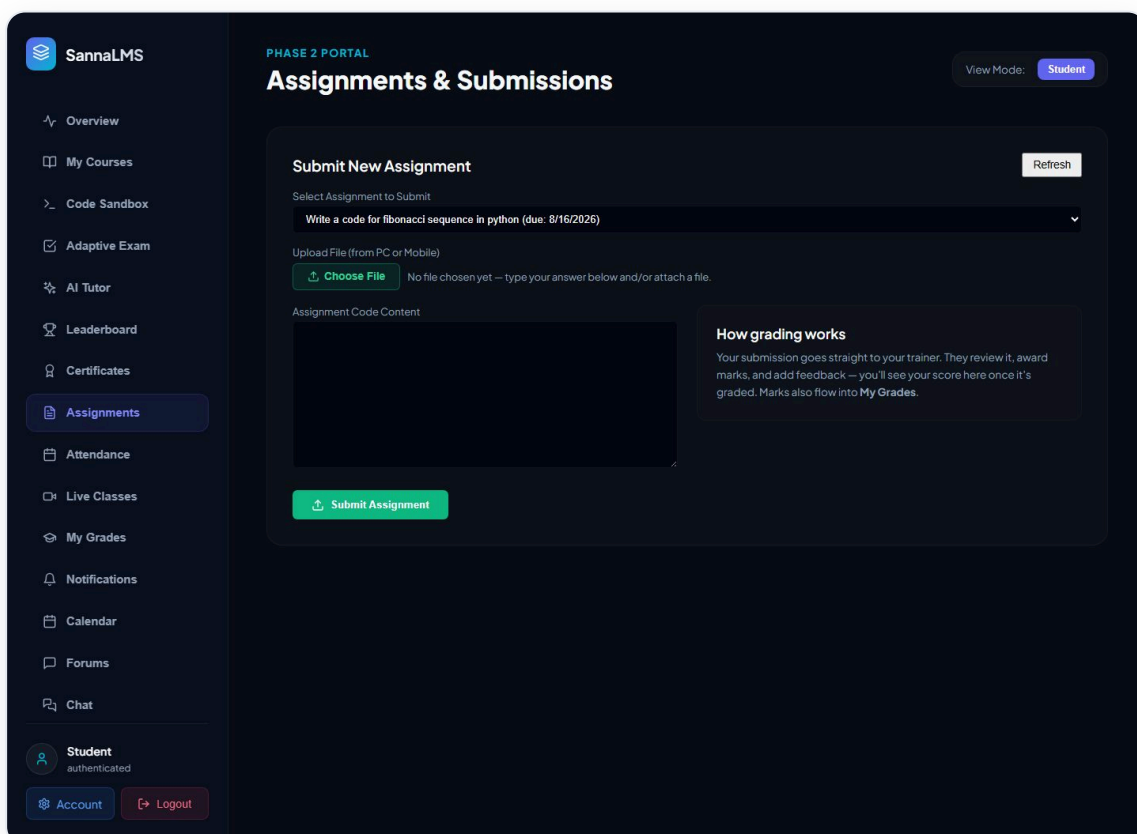

When you complete a course, your certificate appears here with a unique verification code anyone can check.

My certificates

6.8 Assignments

See assigned work, submit files or code, and fix a wrong attachment by re-uploading — no new submission needed.

6.9 Attendance

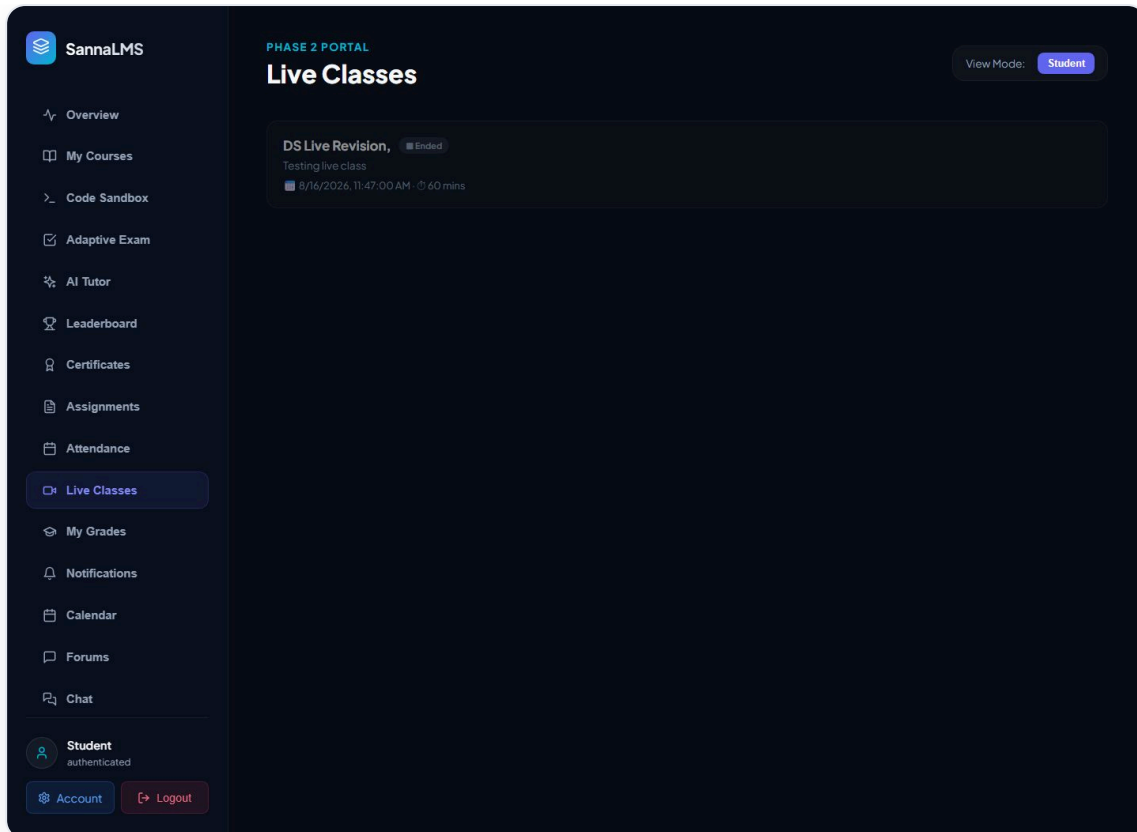

Check in to a live session with one tap (QR or GPS). See which course and session you're marking attendance for.

The screenshot displays the SannaLMS Student GPS & QR Attendance Portal. The interface is dark-themed with a sidebar on the left containing navigation links: Overview, My Courses, Code Sandbox, Adaptive Exam, AI Tutor, Leaderboard, Certificates, Assignments, Attendance (highlighted), Live Classes, My Grades, Notifications, Calendar, Forums, and Chat. The main content area is titled 'PHASE 2 PORTAL Student GPS & QR Attendance Portal' and includes a 'View Mode: Student' toggle. Key statistics at the top show 'Sessions Attended: 0/1', 'Attendance Rate: 0%', and a 'Status Requirement: Low Attendance Warning'. The 'Attendance Check-In' section shows the selected course 'Data Structures - CSE - 2026-27 Sem 3 A' and the session 'DS Lecture 1 - 8/16/2026 [Ended]'. It offers two methods: 'Method A: QR Code Check-In' with a QR code and a 32-character token '3379f2d3005a264ee5f45360abc2e7', and 'Method B: GPS Geofence Check-In' with latitude '12.9716' and longitude '77.5946'. A 'Recent Attendance Ledger' section is also present. The bottom of the page shows a 'Student' profile with 'Account' and 'Logout' buttons.

Attendance check-in

6.10 Live classes

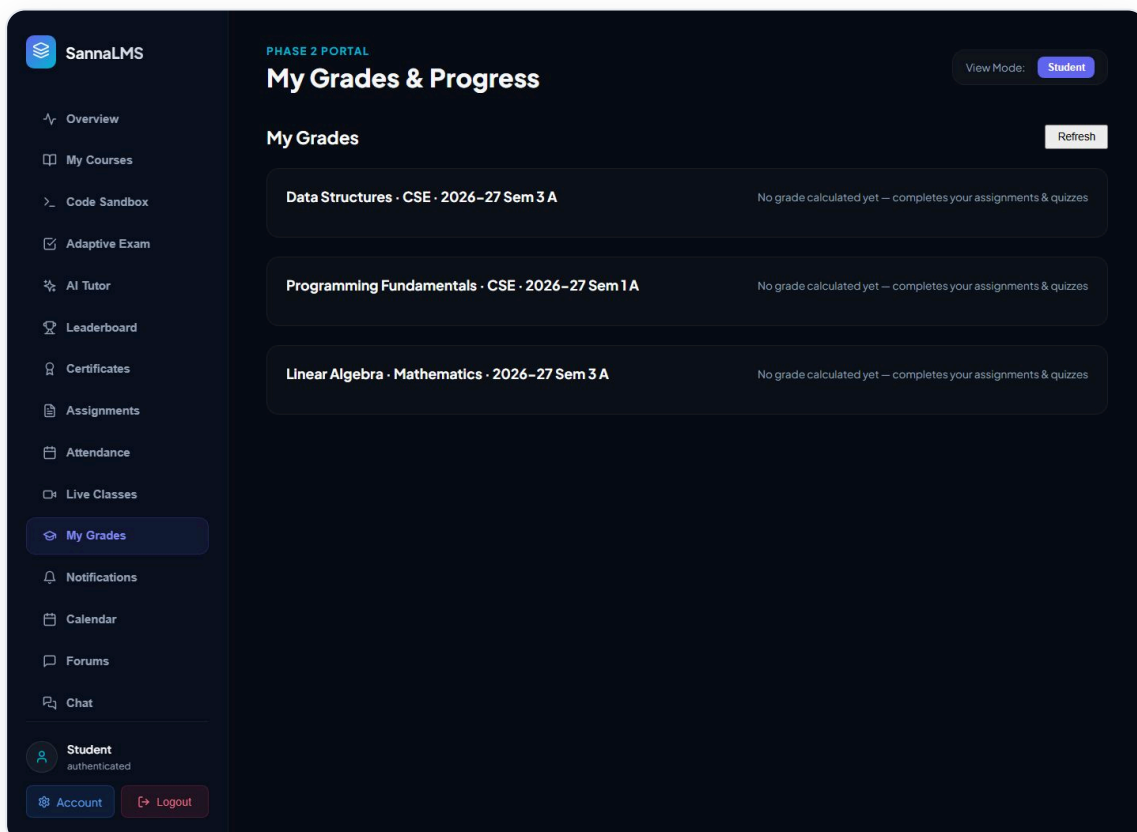

Join scheduled video classes from your trainer with one click.

Live classes — join video sessions

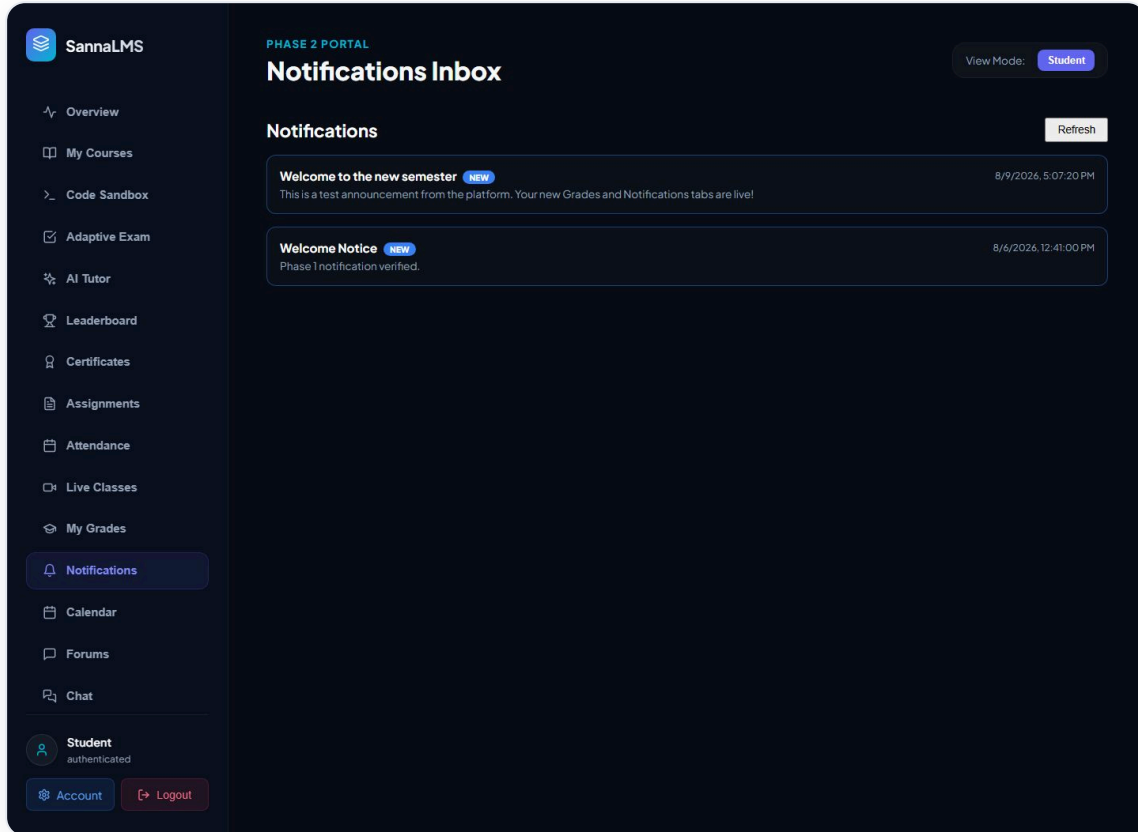

6.11 My Grades

Your grade card per course — scores, grades, and CGPA, updated live as trainers grade your work.

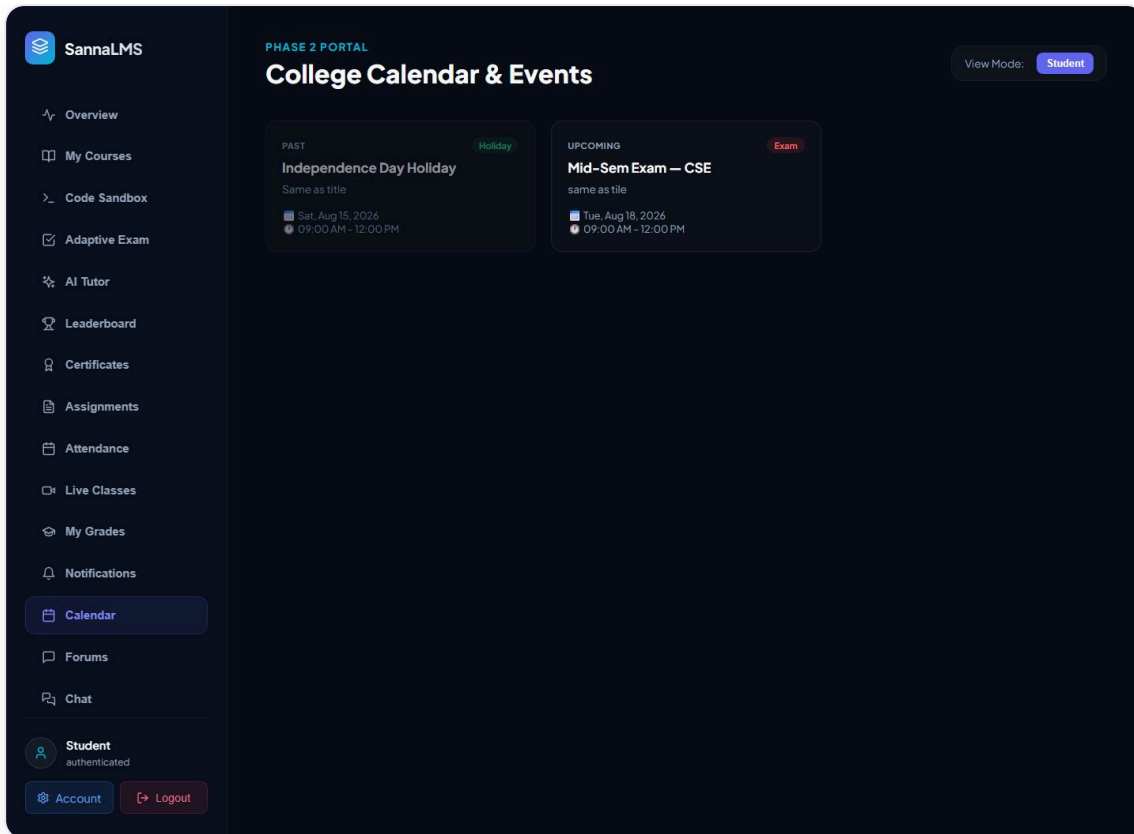

6.12 Notifications, Calendar, Forums & Chat

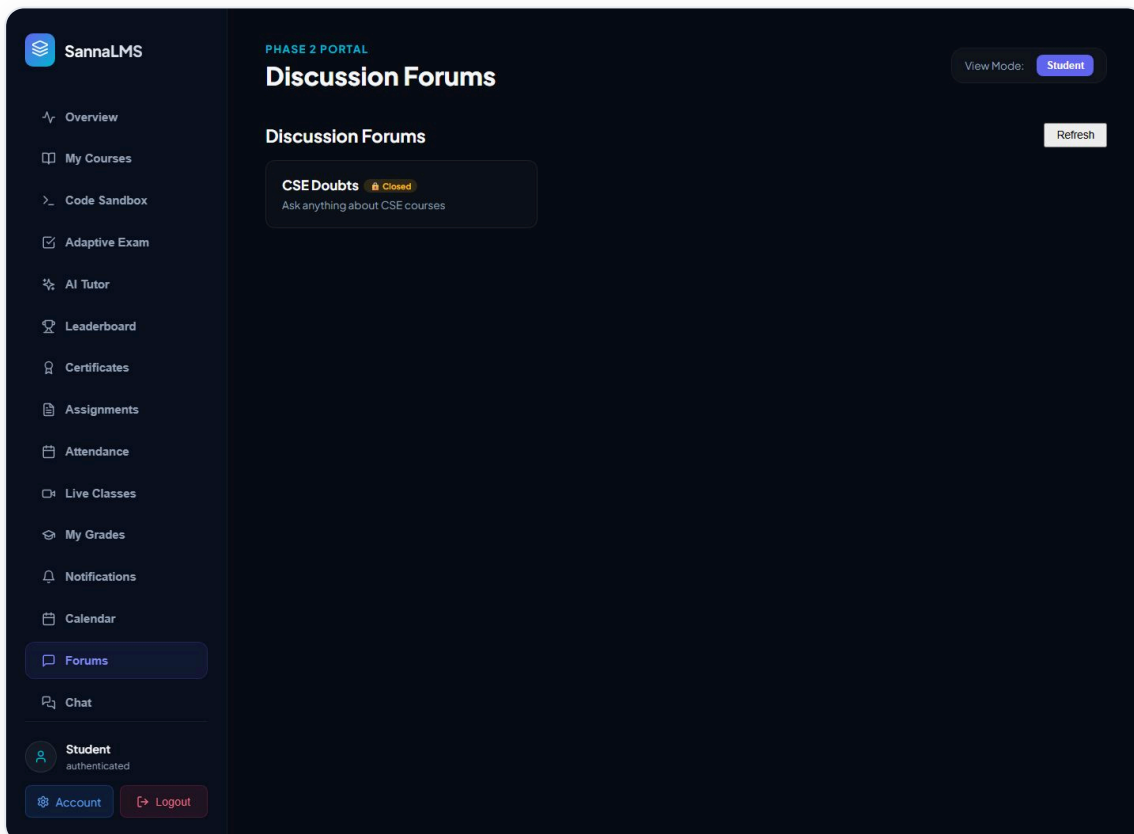

Stay in the loop: announcements, college events, discussion forums, and chat with classmates and trainers.

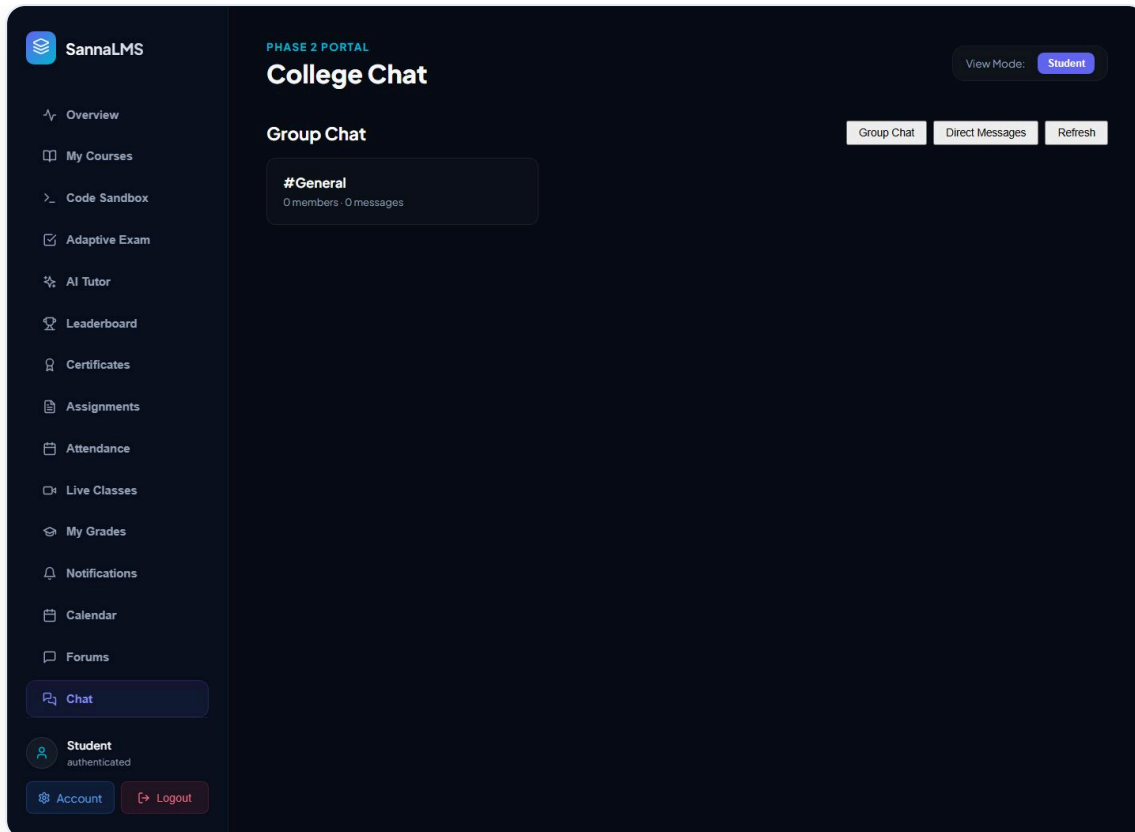

Notifications inbox

7. End-to-End Workflows

7.1 The trainer → quiz → student → gradebook loop

1. Trainer opens **Question Bank** → adds (or imports) questions.
2. Trainer creates a **Quiz** from those questions and publishes it.
3. Student opens **Adaptive Exam** → sees the quiz → takes it → submits.
4. The score is auto-graded instantly and appears in the trainer's **Gradebook** and the student's **My Grades**.

7.2 Onboard a college (Super Admin)

1. **Colleges** → + **Add College** → fill name, admin email, tenant ID.
2. College admin logs in and builds **Departments** → **Branches** → **Semesters** → **Subjects** → **Sections**.
3. College admin creates **Courses** and assigns trainers.

4. Import students via **Bulk Import Users** (CSV), or enroll them course by course.
5. Trainers publish quizzes/assignments; students learn and take tests; the gradebook fills in.

7.3 Attendance flow

1. Trainer/Admin creates an **Attendance session** for a course (with a QR code).
2. Trainer **starts** the session; students can check in only while it is live.
3. Students tap **Check In** — attendance is recorded instantly.
4. When the trainer ends the session, attendance auto-closes.

7.4 Live class flow

1. Trainer schedules a **Live Class** for a course (title, date/time, duration).
2. Students see it in their **Live Classes** tab.
3. Trainer clicks **Go Live** → students join the video room.
4. Trainer ends the class; it is marked *Ended* and cannot restart.

7.5 Certificate flow

1. Admin/Trainer issues a certificate to a student (course, grade, CGPA).
2. Student sees it in **Certificates** with a unique number.
3. Anyone can **verify** the number — no login needed.

8. Common Questions

Can one platform really run multiple colleges?

Yes. Every college is a separate tenant with its own data, admin, and structure — all managed from one Super Admin dashboard. College admins and students only ever see their own college.

Do students need an app install?

No. Everything runs in any modern web browser on any device.

How are quiz scores calculated?

Multiple-choice questions are graded automatically on submission. Essay/code questions are graded by the trainer, who releases the score. The gradebook then calculates the grade and CGPA.

Can students cheat on attendance?

QR and GPS check-in are bound to a live session started by the trainer, so students can only check in while the class is actually running.

Are certificates verifiable?

Yes — each certificate has a unique number that can be verified publicly without logging in, so employers and universities can confirm authenticity.

What happens when a semester ends?

Students can be promoted to the next semester; grades, grade cards, and CGPA follow them.
