

Building Materials - Question Bank

Course: Building Materials (ARC201) | B.Arch | Semester 4 | Year 2

1. Which material is the most common binder in concrete?

- a) Cement
- b) Sand
- c) Water
- d) Aggregate

Answer: a

2. Which of these is a natural building stone?

- a) Granite
- b) Brick
- c) Glass
- d) Steel

Answer: a

3. Which material is produced by heating limestone and clay?

- a) Cement
- b) Timber
- c) Aluminum
- d) Plastic

Answer: a

4. Which of these is a sustainable building material?

- a) Bamboo
- b) PVC
- c) Asphalt
- d) Lead

Answer: a

5. What is the function of reinforcement in concrete?

- a) Resist tensile forces
- b) Increase weight
- c) Reduce cost
- d) Change color

Answer: a

6. Which material has the highest thermal insulation value?

- a) Fiberglass
- b) Steel
- c) Concrete
- d) Aluminum

Answer: a

7. Which of these is a ferrous metal?

- a) Steel
- b) Copper
- c) Aluminum
- d) Zinc

Answer: a

8. What is mortar used for?

- a) Binding bricks or blocks
- b) Roofing
- c) Insulation
- d) Painting

Answer: a

9. Which material is used to make glass?

- a) Silica sand
- b) Clay
- c) Lime only
- d) Gypsum

Answer: a

10. What is the curing of concrete?

- a) Keeping it moist to gain strength
- b) Drying it quickly
- c) Painting it
- d) Adding more water

Answer: a

11. Explain the difference between cement and concrete.

(Write your answer in the space provided.)

12. Describe the properties that make timber a good building material and its limitations.

(Write your answer in the space provided.)
