

1. What is pharmacology?

- a) The study of drugs and their effects
- b) The study of viruses
- c) The study of plants
- d) The study of genetics

Answer: a

2. Which route of drug administration has the fastest onset?

- a) Intravenous
- b) Oral
- c) Topical
- d) Subcutaneous

Answer: a

3. What is a side effect?

- a) An unintended effect of a drug
- b) The desired therapeutic effect
- c) A drug interaction
- d) A placebo response

Answer: a

4. Which term means the study of how the body affects a drug?

- a) Pharmacokinetics
- b) Pharmacodynamics
- c) Pharmacognosy
- d) Pharmacy

Answer: a

5. Which term means the study of how a drug affects the body?

- a) Pharmacodynamics
- b) Pharmacokinetics
- c) Toxicology
- d) Posology

Answer: a

6. What is the half-life of a drug?

- a) Time for its concentration to halve
- b) Time to full effect
- c) Time it stays in the stomach
- d) Time until expiry

Answer: a

7. Which is a common analgesic?

- a) Paracetamol
- b) Insulin
- c) Warfarin
- d) Omeprazole

Answer: a

8. What does ADME stand for?

- a) Absorption, Distribution, Metabolism, Excretion
- b) Analysis, Dosage, Metabolism, Effect
- c) Absorption, Dose, Mode, Excretion
- d) Administration, Distribution, Metabolism, Evaluation

Answer: a

9. Which drug class treats hypertension?

- a) ACE inhibitors
- b) Antacids
- c) Laxatives
- d) Expectorants

Answer: a

10. What is an adverse drug reaction?

- a) A harmful unintended response to a drug
- b) A beneficial response
- c) A placebo effect
- d) A withdrawal symptom

Answer: a

11. Explain the difference between pharmacokinetics and pharmacodynamics.

(Write your answer in the space provided.)

12. Describe the factors that affect drug absorption after oral administration.

(Write your answer in the space provided.)
